

Assembly Rota 2015 - 2016

Aim

To have a consistent approach to spiritual, moral, social and cultural development within assemblies and form time.

Definition

Spiritual development should be seen throughout the way students display:

- their personal beliefs, which may include their religious beliefs
- their ability to communicate these beliefs in discussion and through their behaviour
- their willingness to reflect on experiences and to look for meanings in these experiences
- their sense of wonder as they become more conscious of the deeper meanings of the world around them and their personal experiences.

Moral development should be seen by the extent to which students display:

- an understanding of the difference between right and wrong
- respect for the person and property of themselves and others
- a respect for the truth
- the ability to make responsible and thoughtful judgements on moral issues
- their own moral behaviour

Social development should be seen through:

- the quality of relationships in school
- their ability to behave responsibly and use their initiative
- their ability to work successfully and co-operatively with one another, in small groups and the school community as a whole
- their growing understanding of society, the family, the school, local and wider community, work and the basic structures and working processes which enable all these systems to function effectively

Cultural development is seen by the extent to which students:

- widen their knowledge, understanding, personal interest and experiences through the school curriculum and their participation in a wide range of cultural activities
- have an understanding of cultural diversity within society

AUTUMN TERM 2015
